

Vebgenix API Documentation

Requests, sample input data, and sample success responses

Requests documented: 172

Generated: 2026-05-06

How To Read This Document

Each API entry contains metadata, sample input, and a representative success response. Actual values vary. Sensitive values are redacted.

Module	Requests
Academics	52

Academics

Create Class

Folder	Academics / Classes
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation CreateClass
Variables	input
Saves	class_id

Sample input

```
{
  "query": "mutation CreateClass($input: AWSJSON!) { createClass(input: $input) }",
  "variables": {
    "input": "{\\"name\\":\\"Grade 10\\",\\"code\\":\\"G10\\",\\"campusId\\":\\"69fae2a012627d3790c2e8a1\\",\\"academicYearId\\":\\"69fae2a012627d3790c2e8a1\\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "createClass": {
      "id": "69fae2a012627d3790c2e8a1",
      "name": "Grade 10",
      "code": "G10",
      "status": "ACTIVE"
    }
  }
}
```

List Classes

Folder	Academics / Classes
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query
Variables	None
Saves	class_id

Sample input

```
{
  "query": "query { listClasses(academicYearId: \"69fae2a012627d3790c2e8a1\") }",
  "variables": {}
}
```

Sample success response

```
{
  "data": {
    "listClasses": [
      {
        "id": "69fae2a012627d3790c2e8a1",
        "name": "Grade 10",
        "code": "G10",
        "status": "ACTIVE"
      }
    ]
  }
}
```

Create Section

Folder	Academics / Classes
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation CreateSection
Variables	classId, input
Saves	section_id

Sample input

```
{
  "query": "mutation CreateSection($classId: ID!, $input: AWSJSON!) { createSection(classId: $classId, input: $input) }",
  "variables": {
    "classId": "69fae2a012627d3790c2e8a1",
    "input": "{ \"name\": \"A\", \"academicYearId\": \"69fae2a012627d3790c2e8a1\", \"campusId\": \"69fae2a012627d3790c2e8a1\", \"capacity\": 40 }"
  }
}
```

Sample success response

```
{
  "data": {
    "createSection": {
      "id": "69fae2a012627d3790c2e8a1",
      "name": "A",
      "classId": "69fae2a012627d3790c2e8a1",
      "academicYearId": "69fae2a012627d3790c2e8a1",
      "capacity": 40
    }
  }
}
```

List Sections

Folder	Academics / Classes
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query
Variables	None
Saves	section_id

Sample input

```
{
  "query": "query { listAllSections(classId: \"69fae2a012627d3790c2e8a1\", academicYearId: \"69fae2a012627d3790c2e8a1\") }",
  "variables": {}
}
```

Sample success response

```
{
  "data": {
    "listAllSections": [
      {
        "id": "69fae2a012627d3790c2e8a1",
        "name": "A",
        "classId": "69fae2a012627d3790c2e8a1",
        "academicYearId": "69fae2a012627d3790c2e8a1",
        "capacity": 40
      }
    ]
  }
}
```

Create Subject

Folder	Academics / Subjects & Timetable Builder
Method	POST

URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation CreateSubject
Variables	input
Saves	subject_id

Sample input

```
{
  "query": "mutation CreateSubject($input: AWSJSON!) { createSubject(input: $input) }",
  "variables": {
    "input": "{\n\"name\": \"Mathematics\", \"code\": \"MATH\", \"campusId\": \"69fae2a012627d3790c2e8a1\", \"type\": \"CORE\", \"creditsOrPeriods\": \"1\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "createSubject": {
      "id": "69fae2a012627d3790c2e8a1",
      "name": "Mathematics",
      "code": "MATH10",
      "subjectType": "CORE"
    }
  }
}
```

List Subjects

Folder	Academics / Subjects & Timetable Builder
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query ListSubjects
Variables	campusId
Saves	subject_id

Sample input

```
{
  "query": "query ListSubjects($campusId: ID) { listSubjects(campusId: $campusId) }",
  "variables": {
    "campusId": "69fae2a012627d3790c2e8a1"
  }
}
```

Sample success response

```
{
  "data": {
    "listSubjects": [
      {
        "id": "69fae2a012627d3790c2e8a1",
        "name": "Mathematics",
        "code": "MATH10",
        "subjectType": "CORE"
      }
    ]
  }
}
```

Replace Section Timetable

Folder	Academics / Subjects & Timetable Builder
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL

Operation	mutation ReplaceSectionTimetable
Variables	sectionId, slots
Saves	None

Sample input

```
{
  "query": "mutation ReplaceSectionTimetable($sectionId: ID!, $slots: [TimetableSlotInput!]) { replaceSectionTimetable(sectionId: $sectionId, slots: $slots) { sectionId slots { id dayOfWeek periodNumber startTime endTime subjectId teacherProfileId room label isBreak } } }",
  "variables": {
    "sectionId": "69fae2a012627d3790c2e8a1",
    "slots": [
      {
        "dayOfWeek": "MON",
        "periodNumber": 1,
        "startTime": "09:00",
        "endTime": "09:45",
        "subjectId": "69fae2a012627d3790c2e8a1",
        "teacherProfileId": "69fae2a012627d3790c2e8a1",
        "room": "101",
        "label": "Mathematics",
        "isBreak": false
      },
      {
        "dayOfWeek": "MON",
        "periodNumber": 2,
        "startTime": "09:45",
        "endTime": "10:00",
        "label": "Break",
        "isBreak": true
      }
    ]
  }
}
```

Sample success response

```
{
  "data": {
    "replaceSectionTimetable": {
      "sectionId": "69fae2a012627d3790c2e8a1",
      "slots": [
        {
          "id": "69fae2a012627d3790c2e8a1",
          "sectionId": "69fae2a012627d3790c2e8a1",
          "dayOfWeek": "sample",
          "periodNumber": 1,
          "startTime": "09:00",
          "endTime": "09:00",
          "label": "sample",
          "isBreak": true
        }
      ]
    }
  }
}
```

Get Section Timetable

Folder	Academics / Subjects & Timetable Builder
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query GetSectionTimetable
Variables	sectionId
Saves	None

Sample input

```
{
  "query": "query GetSectionTimetable($sectionId: ID!) { getSectionTimetable(sectionId: $sectionId) { sectionId slots { id dayOfWeek periodNumber startTime endTime subjectId teacherProfileId room label isBreak } } }",
  "variables": {
    "sectionId": "69fae2a012627d3790c2e8a1"
  }
}
```

Sample success response

```
{
  "data": {
    "getSectionTimetable": {
      "sectionId": "69fae2a012627d3790c2e8a1",

```

```
      "slots": [
        {
          "id": "69fae2a012627d3790c2e8a1",
          "dayOfWeek": "sample",
          "periodNumber": 1,
          "startTime": "09:00",
          "endTime": "09:00",
          "label": "sample",
          "isBreak": true
        }
      ]
    }
  }
}
```

Get Teacher Timetable

Folder	Academics / Subjects & Timetable Builder
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query GetTeacherTimetable
Variables	profileId
Saves	None

Sample input

```
{
  "query": "query GetTeacherTimetable($profileId: ID!) { getTeacherTimetable(profileId: $profileId) { slots { id sectionId dayOfWeek periodNumber label isBreak } } }",
  "variables": {
    "profileId": "69fae2a012627d3790c2e8a1"
  }
}
```

Sample success response

```
{
  "data": {
    "getTeacherTimetable": {
      "slots": [
        {
          "id": "69fae2a012627d3790c2e8a1",
          "sectionId": "69fae2a012627d3790c2e8a1",
          "dayOfWeek": "sample",
          "periodNumber": 1,
          "startTime": "09:00",
          "endTime": "09:00",
          "label": "sample",
          "isBreak": true
        }
      ],
      "incharges": [
        {
          "id": "69fae2a012627d3790c2e8a1",
          "role": "sample"
        }
      ]
    }
  }
}
```

Enroll Student

Folder	Academics / Students
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation EnrollStudent
Variables	input
Saves	student_id

Sample input

```
{
```

```
    "query": "mutation EnrollStudent($input: AWSJSON!) { enrollStudent(input: $input) }",
    "variables": {
      "input": "{\"firstName\":\"Arjun\",\"lastName\":\"Kumar\",\"dateOfBirth\":\"2010-03-15\",\"gender\":\"MALE\",\"phone\":\"9876543210\", \"id\":\"69fae2a012627d3790c2e8a1\"}"
    }
  }
}
```

Sample success response

```
{
  "data": {
    "enrollStudent": {
      "id": "69fae2a012627d3790c2e8a1",
      "admissionNo": "ADM2026001",
      "registrationNo": "REG2026001",
      "rollNo": "1",
      "fullName": "Sample Student",
      "status": "ACTIVE"
    }
  }
}
```

Get Student

Folder	Academics / Students
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query GetStudent
Variables	id
Saves	None

Sample input

```
{
  "query": "query GetStudent($id: ID!) { getStudent(id: $id) }",
  "variables": {
    "id": "69fae2a012627d3790c2e8a1"
  }
}
```

Sample success response

```
{
  "data": {
    "getStudent": {
      "id": "69fae2a012627d3790c2e8a1",
      "admissionNo": "ADM2026001",
      "registrationNo": "REG2026001",
      "rollNo": "1",
      "fullName": "Sample Student",
      "status": "ACTIVE"
    }
  }
}
```

Update Student

Folder	Academics / Students
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation UpdateStudent
Variables	input, studentId
Saves	None

Sample input

```
{
  "query": "mutation UpdateStudent($studentId: ID!, $input: AWSJSON!) { updateStudent(studentId: $studentId, input: $input) }",
  "variables": {
    "studentId": "69fae2a012627d3790c2e8a1",
    "input": "{\"phone\":\"9876543212\"}"
  }
}
```

```
}
```

Sample success response

```
{
  "data": {
    "updateStudent": {
      "id": "69fae2a012627d3790c2e8a1",
      "admissionNo": "ADM2026001",
      "registrationNo": "REG2026001",
      "rollNo": "1",
      "fullName": "Sample Student",
      "status": "ACTIVE"
    }
  }
}
```

Assign Student to Class

Folder	Academics / Students
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation AssignStudentClass
Variables	input, studentId
Saves	None

Sample input

```
{
  "query": "mutation AssignStudentClass($studentId: ID!, $input: AWSJSON!) { assignStudentClass(studentId: $studentId, input: $input) }",
  "variables": {
    "studentId": "69fae2a012627d3790c2e8a1",
    "input": "{\"classId\":\"69fae2a012627d3790c2e8a1\",\"sectionId\":\"69fae2a012627d3790c2e8a1\",\"academicYearId\":\"69fae2a012627d3790c2e8a1\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "assignStudentClass": {
      "id": "69fae2a012627d3790c2e8a1",
      "name": "Grade 10",
      "code": "G10",
      "status": "ACTIVE"
    }
  }
}
```

Update Student Status

Folder	Academics / Students
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation UpdateStudentStatus
Variables	status, studentId
Saves	None

Sample input

```
{
  "query": "mutation UpdateStudentStatus($studentId: ID!, $status: String!) { updateStudentStatus(studentId: $studentId, status: $status) }",
  "variables": {
    "studentId": "69fae2a012627d3790c2e8a1",
    "status": "ACTIVE"
  }
}
```

Sample success response

```
{
  "data": {
    "updateStudentStatus": {
      "id": "69fae2a012627d3790c2e8a1",
      "admissionNo": "ADM2026001",

        "name": "Sample Name"
      }
    ]
  }
}
```

Generate Roll Numbers — Alphabetical

Folder	Academics / Roll Numbers
Method	POST

URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation GenerateRollNumbers
Variables	input
Saves	None

Sample input

```
{
  "query": "mutation GenerateRollNumbers($input: AWSJSON!) { generateRollNumbers(input: $input) }",
  "variables": {
    "input": "{\"academicYearId\":\"69fae2a012627d3790c2e8a1\",\"campusId\":\"69fae2a012627d3790c2e8a1\",\"gradeId\":\"69fae2a012627d3790c2e8a1\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "generateRollNumbers": {
      "id": "69fae2a012627d3790c2e8a1",
      "status": "ACTIVE",
      "name": "Sample Name"
    }
  }
}
```

Generate Roll Numbers — Sequential

Folder	Academics / Roll Numbers
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation GenerateRollNumbers
Variables	input
Saves	None

Sample input

```
{
  "query": "mutation GenerateRollNumbers($input: AWSJSON!) { generateRollNumbers(input: $input) }",
  "variables": {
    "input": "{\"academicYearId\":\"69fae2a012627d3790c2e8a1\",\"campusId\":\"69fae2a012627d3790c2e8a1\",\"gradeId\":\"69fae2a012627d3790c2e8a1\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "generateRollNumbers": {
      "id": "69fae2a012627d3790c2e8a1",
      "status": "ACTIVE",
      "name": "Sample Name"
    }
  }
}
```

Freeze Roll Numbers

Folder	Academics / Roll Numbers
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	mutation FreezeRollNumbers
Variables	input

Saves	None
-------	------

Sample input

```
{
  "query": "mutation FreezeRollNumbers($input: AWSJSON!) { freezeRollNumbers(input: $input) }",
  "variables": {
    "input": "{\\\"academicYearId\\\":\\\"69fae2a012627d3790c2e8a1\\\",\\\"campusId\\\":\\\"69fae2a012627d3790c2e8a1\\\",\\\"gradeId\\\":\\\"69fae2a012627d3790c2e8a1\\\"}"
  }
}
```

Sample success response

```
{
  "data": {
    "freezeRollNumbers": true
  }
}
```

List Roll Number Batches

Folder	Academics / Roll Numbers
Method	POST
URL	https://example.appsync-api.ap-south-1.amazonaws.com/graphql
Kind	GraphQL
Operation	query
Variables	None
Saves	None

Sample input

```
{
